INNOVATION & TECHNOLOGY

Our production plants are equipped with advanced extruders, calibrators, automatic mixing equipment, tank plates and cooling tanks, apart of extrusion lines, we use an unique exclusive technology called **HOTMELT TECH[®]** to produce wood and metallic colored finish profiles. With our experienced team of engineers and devoted workforce C.FOUR is well known for it's high quality and responding to changes in market requirements.

QUALITY CONTROL AND TESTING

One of our key features at C.FOUR is testing to ensure maintaining fine quality. In our advanced laboratory following aspects are checked:

- Material
- Appearance
- dimensions and tolerances
- mass of main profiles
- heat reversion
- resistance to impact of main profiles by falling mass
- behaviour after heating at 150 c
- resistance to weathering and weldability

HOTMELT TECH[®]

F.P.S.CO aims to create world class products to evolutionized the construction and renovation industry by introducing its high quality and game-changing upvc products and technologies.

As a market leader in upvc profile industry C.four provides customized solutions and unique technology designed to meet your expectations and suit any harsh environmental conditions.

HOTMELT TECH[®] is the result of years of research and studying of our experienced R&D team and innovative engineering which is exclusive. with it`s special coating layer on profiles that make c.four profiles fade resistance and give them more appealing look; c.four profile is a reasonable choice for replacement of laminated ones in matter of quality and even price.

arizona desert testing LLC

Arizona Desert Testing LLC (AZTEST) is a materials testing laboratory that specializes in accelerated and outdoor weathering services.

testing is performed in the Arizona desert — an ideal environment for weathering studies. Blistering heat, extreme aridity and near-constant sunshine combine to create a virtually unmatched outdoor laboratory for benchmarking product durability under harsh conditions.

the laboratory is accredited by A2LA to ISO 17025 requirements. Arizona Desert Testing is also accredited by AMECA (Automotive Manufacturers Equipment Compliance Agency) for weathering services in accordance with SAE J576.

FSP co always been extremely committed to research and development. therefore for the first time in country C.FOUR colored profiles had sent to United States of America to get tested for color fading and withstanding the weathering effects of desert conditions ensuring they long lasting beauty and they passed the test.
